Tunis, Tunisia

To Her Excellency Carol McQueen,

We are honoured to take this opportunity on behalf of the Glia project, Ecole Supérieure Privée d'Ingénierie et de Technologies (Esprit) and Faculté de Médecine de Tunis (FMT) to invite your Excellency to join us on July 4, 2019 starting at 1000h, for an event to celebrate the launch of Glia Tunisia.

The Glia project is a multidisciplinary collaboration between engineers, physicians and other stakeholders to create high-quality low-cost medical devices using open source methodologies and innovative technologies such as 3D printing. This project was started in Canada in 2014 and is acclaimed as a groundbreaking project by stakeholders in hospitals, ministries of health and industry. The University of Western Ontario in London, Ontario, is a major contributor to the Glia project's work under the supervision of Canadian emergency physician Dr. Tarek Loubani.

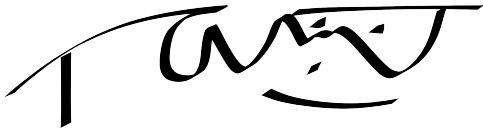

On July 4<sup>th</sup>, Glia Tunisia will launch in cooperation with Glia, Esprit and FMT. This unique and important collaboration will result in Tunisia developing significant engineering and biomedical capacity to improve care for patients in Tunisia and the North Africa region. The President of the Esprit administrative council and the Dean of FMT will give introductory remarks at the launch event.

We invite Her Excellency to join Glia's Canadian team on July 4, 2019, and to give remarks to those assembled celebrating this important link between Tunisia and Canada. The program will start at 1000h.

If you have any questions, please do not hesitate to contact Dr. Tarek Loubani at +1 519 488 6475 and Dr. Ahmed Abbes at +33 6 42 03 49 75.

We look forward to your engagement in this matter.

Sincerely,

A stylized, handwritten signature in black ink, appearing to read 'T. Loubani'.

Dr. Tarek Loubani, BSc (Hon), MD, CCFP-EM

CEO, Glia Inc.

Consultant, Division of Emergency Medicine

London Health Sciences Centre, Canada

Associate professor, Faculty of Medicine and Dentistry

Western University, Canada
